

Vahdeta Suljic
Computer Science Department 2020 Collins Award Winner

Vahdeta Suljic is truly an outstanding student in the Computer Science department. With her 4.0 GPA, she excelled in all of her classes, and she shines way beyond her course work. For several years Vahdeta hosted a radio show on Saint Louis University radio. She participated in the SLU MEDLaunch program, developing an application for mental health patients. In April of 2019, in her Junior year, Vahdeta was a co-author of a paper titled: "Machine Learning and Eye Tracking on Motion-Evoked EEG Signals". This paper was presented at the annual conference hosted by the Institute of Biological Engineering. In addition to her Computer Science interests, Vahdeta has demonstrated a strong desire to help those in need: she works with the elderly as a home health aide and volunteered at a health screening clinic. After graduating from SLU, Vahdeta plans on attending a medical school, to fulfil her dream of becoming a doctor.
