Dear Ms. / Mr. Lastname:

Use Business Professional writing style when writing a cover letter. Take the time to research the address of the employer and include at the top. Research the person to whom you are sending the letter. If you don't know, use the phrase, "Dear Hiring Team".

The opening paragraph should state why you are writing, the position for which you are applying, and how you found the position. If someone referred you, include that as well. State why you are interested in the position or company and provide a one sentence summary of the skills and your educational background that make you qualified for the position. Make it clear why you want to work for THEIR company.

The second and optional third paragraph includes your skills and job-related qualifications. Let reader to quickly see that you are qualified for the role. Give examples demonstrating your skills and experience while highlighting the skills mentioned in the job description. Limit the use of passive voice (ex. I was club treasurer vs. I served as club treasurer). Be careful not to begin each sentence with "I" or copy bullet points from your resume; your cover letter should be distinct from your resume.

Approaches for this section of the cover letter:

- Select an experience and highlight the skills you have relevant to the job.
- Select one or two categories of skills and give examples of how you have those skills.
- Use a bulleted list to highlight your most relevant skills to the position.

The final paragraph should state that you would like to interview and discuss further how your qualifications meet the needs of the company. Most employers welcome candidates who are proactive, such as indicating you will contact them in one week to arrange a meeting. Be sure to thank the reader for their time in considering you as an applicant.

Sincerely,
