“Abdominal Surgery: Repair of Aortic Aneurysm”

Michael Williams, Jr., MD

Vascular Surgeon

Saint Louis University School of Medicine

- This 60 minute program is offered to students who would like to review basic anatomy of the major systems prior to the start of the workshop. The presenter for this demo will utilize a human cadaver, and a variety of organ specimens to discuss the anatomy. Faculty throughout the week will be presenting with the assumption that all students have a basic understanding of the location and function of the major organs and joints of the human body. There is no additional fee for this presentation.

The ZOOM app will be used for all connections for this workshop. Invitations for daily connections will be sent out from the AIMS email.
