PASE continues to serve the medical community through rental and industry sponsored training programs. Be assured that our staff takes the safety of our guests with the utmost concern and importance; PASE will be taking a proactive approach and follow all federal, state and local regulatory statues.

Per updated university guidelines, starting in January 2022, we will be requiring proof of vaccination or proof of a negative rapid antigen or PCR COVID-19 test taken within 72 hours of the event. This will be required at the registration desk to attend any PASE workshop or program. Please bring a current photo ID along with your proof of vaccination or negative test.

Safety measures to be implemented moving forward:

- All visitors will receive a surgical KN95 mask upon entering the building to be worn during the course. All PASE staff will wear masks throughout the building.
- PPEs to include masks, face shields, goggles, gowns, safety glasses, shoe covers, and hair bouffants are available for all staff and industry partners for use in the lab areas.
- Social distancing guidelines will be adhered throughout the building and dining areas.
- PASE will act in accordance with our gift body program and University recommendations and guidelines regarding the use of specimens and lab set up.
- Hand-sanitizing stations will be readily available throughout the building.
- All door handles, light switches and restrooms will be disinfected several times a day during each program.
- Food service will be contact-less and will include only individual packaged meals, snacks and beverages.

*The PASE staff appreciates your respect and compliance with following these guidelines. We will continue to monitor local and regional regulations and update the facility as needed.
We look forward to welcoming all our clients and industry partners to our facility!*
