II. Intellectual Property Information		
Intellectual Property Title:		
Indicate Intellectual Property Type	(Select all that apply)	Indicate Current Level of Development
Invention		TRL-1: The principles that underlie the technology have been identified.
Software		TRL-2: The application being considered has been outlined and analysis to support the concept has been provided.
Plant Variety		TRL-3: Laboratory tests have been performed to measure parameters of interest and compare to analytical predictions for biological functions critical subsystems.
Ornamental Design		TRL-4: System concepts have been considered and test results are available from <i>in vitro</i> experiment(s), laboratory-scale breadboard(s), or prototype(s).
Creative Work		TRL-5: Results available from <i>in vivo</i> experiment(s) or laboratory-tested breadboard system(s) or prototype(s) that have been integrated with other supporting elements in a simulated operational environment.
Other (Explain below):		TRL-6: Results available from phase 1 clinical trial or laboratory testing of a prototype system that is near the desired configuration in terms of performance, weight, and volume. TRL-7: Phase 2 clinical trial plan is prepared or results are available from testing a prototype system in an operational environment. TRL-8: Results available from phase 2 clinical trial or testing the system in its final configuration under the expected range of environmental conditions in which it will be expected to operate.
		TRL-9: The technology has begun phase 3 clinical trial or actually been applied in its final form and under mission conditions, such as those encountered in operational test and evaluation (OT&E). Other (Please explain below):
